

## 17.4 Trial 4

Complete the following program. (15 points)

- The program is intended to take the input of someone's age (User will only input 16-25),
- Ask users 18 - 25 if they are registered to vote
- Output the users response
  - If they are registered , remind them to vote
  - If they are not registered, ask them to register if they are eligible

**Use only switches.** (15 points)

This output represents an eligible & registered voter:

```
What is your age? 21
Are you registered to vote?
y
Don't forget to vote!
```

This output represents an eligible but unregistered voter:

```
What is your age? 19
Are you registered to vote?
n
Please register if you are eligible
```

This output if they are not eligible:

```
What is your age? 16
You are not eligible to vote
Please register if you are eligible
```
